

ALEJO DI DIEGO

Backend Engineer | Node.js, TypeScript, NestJS, PostgreSQL, Laravel, Docker

Castelar, Buenos Aires, Argentina | +54 11 7244-4127 | alejohernandidiego@gmail.com | [linkedin.com/in/alejo-di-diego](https://www.linkedin.com/in/alejo-di-diego) | github.com/alejoDiDiego | alejo-didiego.vercel.app

PROFESSIONAL SUMMARY

Backend Engineer based in Argentina, focused on Node.js, TypeScript/NestJS, SQL databases (PostgreSQL, SQL Server), REST APIs, testing and backend service design. Professional experience building backend services, internal platforms, integrations, documentation and enterprise technical solutions, with exposure to observability, infrastructure and cybersecurity projects. Strong interest in Rust, blockchain infrastructure and financial systems, looking to contribute to backend platforms where reliability, performance and transparency matter. Available for remote LATAM / US time zone roles.

CORE SKILLS

- **Backend Engineering:** Node.js, TypeScript, NestJS, JavaScript, PHP/Laravel, REST APIs, backend services, Prisma, endpoint development, testing, technical documentation, DDD principles, monoliths and microservices.
- **Databases & Data:** PostgreSQL, MySQL, MariaDB, SQL Server, MongoDB, Firestore, Redis, SQL query design, data modeling basics.
- **Infrastructure & Reliability:** Docker, Linux, observability, Instana, Smart Alerts, incident workflows, enterprise infrastructure exposure, IBM Power and Storage.
- **Security & Enterprise Systems:** QRadar, SOC, SOAR, SIEM, monitoring workflows, escalation criteria, cybersecurity implementation support.
- **Additional Technical Base:** Rust fundamentals, Python, C#, Entity Framework, object-oriented programming, algorithms and software design foundations.
- **Product & Collaboration:** Requirements analysis, stakeholder communication, technical presentations, internal tools, workflow optimization, Jira, Monday, Figma, Git.

PROFESSIONAL EXPERIENCE

Technical Project Manager / Technical Implementation | Sortboks

Oct 2025 - Present

- Leading an Instana implementation for a banking client, coordinating requirements, technical tasks and stakeholder communication.
- Designing Smart Alerts and operational workflows to support incident detection, escalation and reliability practices.
- Managing a cybersecurity solution involving SOC, SOAR and SIEM, including QRadar implementation details, configuration, agents and server-related requirements (Linux, Windows and FortiGate).
- Creating technical documentation, training material and escalation criteria for SOC L1 teams to identify and escalate real incidents.

Backend Developer (NestJS) | NetJam Group

Sep 2025 - Mar 2026

- Built backend services and microservices with Node.js, NestJS and TypeScript, following Domain-Driven Design principles.
- Designed and maintained REST API endpoints, service layers and backend modules for production-oriented applications.
- Wrote tests and technical documentation to improve maintainability and support backend delivery.
- Collaborated on backend architecture decisions involving modularity, data flow and service boundaries.

Pre-Sales Engineer (IBM Power) | IBM

Apr 2025 - Oct 2025

- Analyzed enterprise technical requirements and infrastructure challenges to design solution proposals for clients and partners.
- Led the Linux on Power proposal, translating platform capabilities into client-facing technical and business value.
- Delivered technical presentations in English and collaborated with sales, architecture and engineering teams to validate feasibility.
- Gained exposure to enterprise-grade infrastructure, performance, reliability and deployment considerations.

Storage & Power Pre-Sales Intern | IBM

Oct 2024 - Apr 2025

- Implemented and led an AI on Power proposal; presented the initiative in English to the global CFO of IBM Power.
- Expanded from Storage pre-sales into Power, integrating with IBM infrastructure teams within six months.

Backend-Focused Full Stack Developer (Laravel / JavaScript) | Socialnet

Jan 2024 - Oct 2024

- Developed a web platform from scratch to manage internal and public documentation, including backend modules for tasks, procedures and integrations.
- Built authentication and workflow features including passwordless login, table reordering, GitLab integration, Google Docs API integration and Figma integration.
- Translated business needs into functional and technical specifications for the redesign of the company's main product.
- Contributed to core sections of the company's main application rewrite, focusing on backend logic, integrations and maintainable implementation.

Lead Developer / Product & Project Manager (Next.js, Firebase) | Inmo

Mar 2022 - Dec 2022

- Led a team of 5 to build a real-estate software product from concept to functional prototype.
- Owned scope, requirements, UX direction and development execution across the product lifecycle.
- Built product features with Next.js and Firebase while coordinating technical decisions and delivery.

EDUCATION

Computer Systems Engineering | Universidad Abierta Interamericana (UAI)

Apr 2024 - Dec 2029 | 41% completed | GPA: 4/4

Technical High School in Computer Science | Instituto Tecnico Industrial San Judas Tadeo

Mar 2016 - Dec 2022 | GPA: 4/4 | Highest in graduating class, class delegate for 7 years, National Flag Bearer

LANGUAGES & CERTIFICATIONS

Languages: Spanish native | English advanced (B2 First Certificate, 176/190).

Certificates: B2 First Certificate | Advanced Excel UTN | Power BI - Data Analysis and Business Intelligence.
